CAREER OBJECTIVE

Fresher Java Full Stack Developer with hands-on knowledge of Java, Spring Boot, SQL, and React, seeking a Software Engineer / Full Stack Developer role to apply my technical skills and grow within a team-oriented environment.

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering (ECE) *Apr 2022 – Jun 2025*

Dayananda Sagar University (DSU) | Bengaluru, Karnataka

Intermediate (Diploma) in Civil Engineering (CE) *Apr 2019 – Oct 2021*

Government Polytechnic Aurad | Aurad B, Karnataka

Secondary School (10th Standard) *Mar 2018 – Mar 2019*

Ram and Raj High School | Humnabad, Karnataka

SKILLS

Core Java: Good understanding of OOP concepts, exception handling, and collection frameworks

Backend Development: Hands-on designing and developing RESTful APIs using Spring Boot, Spring Core, Spring MVC, Spring Security, Spring Data JPA, and Hibernate

Database and Connectivity: SQL (SQL*Plus, PostgreSQL)

Web Technologies: React, HTML, CSS, JavaScript Basics

Security: JWT Authentication, Role-Based Access Control (RBAC)

Development Tools & Deployment: Eclipse, VS Code, Postman (API Testing), Git/GitHub, Docker, Render, Neon (Cloud PostgreSQL)

PROJECTS

Multi-Vendor E-Commerce Platform *May 2026 – Jul 2026*

[Live Demo](#)

- Built and deployed a full-stack multi-vendor e-commerce platform using Spring Boot and React, where customers can browse and buy products, and sellers can list and manage their own products and orders.
- Implemented JWT-based authentication with two roles, CUSTOMER and SELLER, along with product search, cart, checkout, simulated Razorpay payment flow, and order cancellation with automatic stock restoration.
- Built a seller dashboard to add, edit, and delete products, and view orders with live status (Pending/Confirmed/Cancelled/Delivered), along with global exception handling for clean JSON error responses.
- Deployed the application end-to-end: backend containerized with Docker and hosted on Render, PostgreSQL database hosted on Neon, and code version-controlled on GitHub.

Food Order Management System *Nov 2025 – Dec 2025*

[GitHub](#)

- Built a backend food ordering system using Spring Boot, JPA/Hibernate, PostgreSQL and Postman (API Testing).
- Implemented business logic for order processing, price calculation, payment validation, and order status management.
- Designed entity relationships and developed RESTful APIs for CRUD operations with validation and error handling.

Flight Booking System *Jan 2025 – Feb 2025*

[GitHub](#)

- Built a backend flight booking system using Spring Boot, JPA/Hibernate, and PostgreSQL.
- Implemented secure authentication, booking workflows, and RESTful backend services.
- Designed APIs for flight search, booking management, and user operations with proper validation.

Live Weather Dashboard *Jul 2025 – Sep 2025*

[Live Demo](#)

- Developed a web-based application to display real-time weather information for multiple cities using API integration.
- Designed and implemented a user-friendly interface using HTML, CSS, and JavaScript for seamless interaction.
- Fetches and displays live data such as temperature, humidity, and wind speed with dynamic updates.

CERTIFICATIONS

Java Full-Stack Development – JSpider | [Verify](#) *Jul 2025*

Basics of Electronics Programming – Infosys | [Verify](#) *Aug 2024*

INTERNSHIP

Embedded Systems & IoT Internship — CSIR-NAL *Feb 2025 – Apr 2025*

Project: Developing a System for Acquiring Data from Diverse Sensors and Transmitting over RF for MAV Applications
